

## Growth Essential Products

Young people have their own specific nutritional requirements. As a parent, your goal should be to give them the nutrients they need – preferably in flavours they love. These growth essential vitamin, mineral, nutrient and phytonutrient supplements are formulated to supply vital nutrients young people need during their growth years.

### About MannaBears®:

# MannaBears® with Ambrotose® Complex

Every parent knows how difficult it can be to get their children to eat the right foods that support healthy growth. This requirement becomes especially difficult when it comes to making sure they snack on nutritious foods instead of high-calorie sweets and other 'junk' foods.

MannaBears® – the latest product innovation for children from Mannatech – are every parent's answer to the continuing challenge of getting children to eat the right foods in the quantities growing bodies need. MannaBears® are designed as scrumptious, chewy, sweet treats in colourful, gummi-bear shapes – a snack food that kids will come back for again and again.

In addition to its specially formulated glyconutritional blend, MannaBears® provide the nutritional goodness of 11 different dehydrated fruits and vegetables. The colourful snacks also contain pomegranate powder. Everything is packed into a colourful, wholesome pectin base, derived from natural sources.

Used as part of a healthy diet, MannaBears® are the ideal snack to help children stay healthy and grow properly.
